1.1 work history

Toyota -> Synamon -> TX

-In Toyota-

develop and improve degital vehicle prototypings with XR (with Unreal Engine, Unity, Matlab and so on)

4

Image courtesy of Toyota Motor Corpora

-In Synamon-

VR SaaS Company

develop VR Coraboration Service with Unity,
improve engineering team

3D IMPORTER

1.2 Why TX

- I love to develop something.
  Especially, car and other Hardware developments.

- I wanna get involved Robot Development.

- TX's Goal is only one in the world.

- I like the TX Principles.
  particularly, "Freedom & Responsibility" and "Begin with the End"

2 What am I doing in TX

- Develop tx-cockpit UI/UX

- Make cockpit in Delivery project (by KDDI)

I guess that UI/UX improvements doesn't need only self view but also many views

So, if you have some feedbacks about cockpit UI/UX.
Please let me know it.

Others

- Currently, I am learning English.

```
If my English is strange or there are better English,
please tell me.

In TX, my first time to speak and discuss by English everytime.
```

For this about 2 months,
I am very grateful for everyone about your helps.
Especially, Genki-san, Jake, Wilson, Mathilde and Pablo.

I still have something I don't know yet.

So I'm looking forward to working with you.
